705-721-1223

The Science of Skating is committed to developing fundamental skating skills through which a hockey player will achieve greater success in the game.

Explosive acceleration, proper use of edges, improved lateral movement, increased balance and precise stopping are just the beginning of the skills that are taught in The Science of Skating

We now offer an Advanced Program that will also deal with body checking, puck control and play making drills. Our focus is on aiding the player to take his or her game to the next level. Get Qualified Instruction from NCCP Certified Coaches.
